

# Look before you Lock

## Spreading awareness to reduce Pediatric Vehicular Heatstroke (PVH)

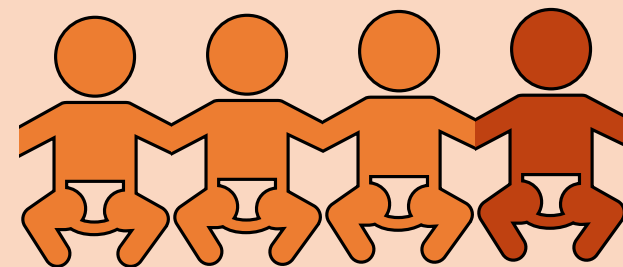

Max car temperatures can reach higher than **150°F!**

**3 out of every 4** deaths from PVH were either due to children being **unintentionally** left behind or from **gaining access** to a car on their own.

**1,041** children have died in hot vehicles due to PVH since **1998**.  
**100%** of deaths from PVH are *preventable*.

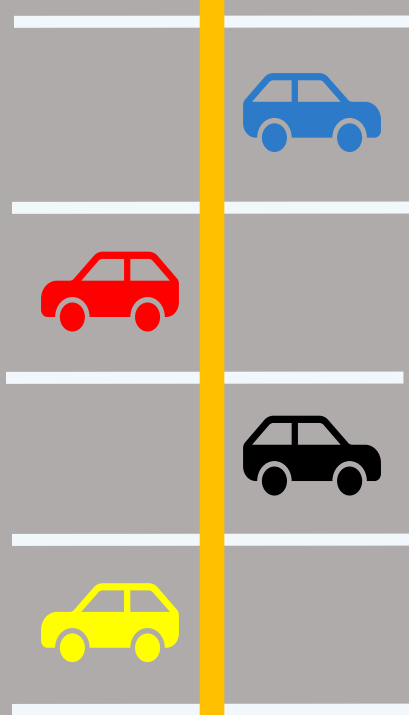

## SAFETY TIPS FOR CAREGIVERS

Avoid leaving children alone in cars, even for a minute.

If you see a child alone in a car, **call 911!**

Always ensure cars are locked and keys are away from reach.

Keep your purse/wallet in the backseat as a reminder.
