

INVITES YOU TO

SHINE A GREEN LIGHT ON NATIONAL INJURY PREVENTION DAY

6.5 CEUs*

THURSDAY, NOVEMBER 18, 2021
8 AM - 4 PM

TGH's Children's Hospital is presenting a daylong virtual symposium of local and national experts dedicated to injury prevention specific to our pediatric population.

The Injury Free Coalition for Kids and the country's leading injury and violence prevention organizations will join forces for the second annual National Injury Prevention Day to raise awareness about the burden of injury, violence and a need for change.

Injuries are the leading cause of death and disability to U.S. children from 1 to 18 years old. Every day, 20 children die from preventable injuries, resulting in more deaths than all diseases combined. We invite you to join us as we light the way toward injury prevention, and discuss topics such as:

- Drowning prevention
- Safe sleep
- Car seat safety and motor vehicle accidents
- Gun safety
- Non-accidental trauma
- The effects of injury on the child throughout their lifetime

TGH team members can attend free of charge.
There is a \$30 registration fee for external attendees.
